### Technical Skills

Frontend: HTML, CSS, JQuery, Javascript, Bootstrap, Foundation.

Backend: MySQL, NoSQL, MongoDB, Express, Node, Handlebars, Third Party API.

### Summary

Full stack web developer and a U.S National Guard vet ready to get out there. Fresh out of the University of Minnesota and earning a certificate in full stack development with newly developed skills in Javascript, CSS, Html, Node.js and Bootstrap responsive designs. Very motivated to solve problems with a focused mindset and ultimately love to be creative with designs. I worked in a team of 3 to develop a DNR app to find information about specific natural areas for outdoor enthusiasts. I make sure to implement friendly UI and UX aspects when developing a design for an app. Ready to learn new things and meet people, as a part of the virtual workforce!

### Projects

**Project-1-dnd** | [Project-1-Respiratory](#) | [Project live page](#)

My role in this project was to implement a 3rd API.

- This allows a user to search a class rating for a monster in dnd and search a snack.
- This app successfully uses an api to get specific data on dnd monsters and places the data in cards. I implemented the user interface to search for a snack and the drop down menu interface.
- Tools/Languages: HTML, CSS, JavaScript and jQuery, Two server-side APIs, Foundation CSS Framework (<https://get.foundation/>), Google Fonts.

**Project\_2\_uofm** | [Project\\_2 Respiratory](#) | [Project Live Link](#)

My role in this project was setting up the handlebars and getting api information loaded on the page.

- This app grabs dnr information when a user logs in and selects an area to explore.

- This app successfully logs a user, allows the user to select an area to explore and once a button is pressed the api information is loaded on the page. I worked on the handlebars for the information to be displayed and button functionality.
- Tools/Languages: -JavaScript, CSS, html, handlebars, express, axios, bcrypt, connect-session-sequelize, dotenv, express-handlebars, express-session, mysql2, sequelize.

### Project 3 Pending

### Previous Work Experience

#### Reinhart

08-2018/ 09-2021

*Truck Driver*

Rogers, MN

- As a truck driver I had many responsibilities and as a delivery role customer service is important.
- Worked long hours in the twilight shift and I had many good responses from customers on how much I care about getting the job done right!
- Took various safety precautions when executing a backing maneuver.

#### K&K Metal

09-2021/ 11-2021

*Truck Driver*

Minneapolis, MN

- I was responsible for picking up and delivering recycled metal.
- Delivered 40,000lbs of metal to be recycled
- Always had a good attitude and understanding with customers

### Additional Work Experience

#### Minnesota National Guard

04-2017/ Current

*Infantry*

MN

- I have acquired good work ethics and responsibility
- Have never missed a day and always did my best
- Had the responsibility of a security clearance
- Was in charge of \$17,500 dollars in equipment

### Education

University of Minnesota, Mn  
Full Stack Developer Certificate

03/2022
