**Summary**

Front-end web developer and a U.S National Guard vet ready to get out there. Received a certificate in Full Stack Web Development University of Minnesota with skills in Javascript, CSS, Html, Node.js and Bootstrap responsive designs. Very motivated to solve problems with a focused mindset and ultimately love to be creative with designs. Worked in a team of 3 to develop a Department of Natural Resources app to find information about specific natural areas for outdoor enthusiasts. Made sure to implement friendly UI and UX aspects when developing a design for an app. Ready to learn new things and meet people, as a part of the technical workforce!

**Technical Skills**

Frontend: HTML, CSS, JQuery, Javascript, Bootstrap & React-Bootstrap, Foundation, React, SCSS.
Backend: MySQL, NoSQL, MongoDB, Express, Node.js, Handlebars, Third Party API, Graphql, Restful API, OOP.

**Projects**

**Project-1-dnd** | Project-1-Repository: https://bit.ly/3IJoeZp  | Project live page: https://bit.ly/3pACFHE
My role in this project was to implement a 3erd API.

- This allows a user to search a class rating for a monster in dnd and search a snack.

- This app successfully uses an api to get specific data on dnd monsters and places the data in cards.

- Implemented the user interface to search for a snack and the drop down menu interface.

- Tools/Languages: HTML, CSS, JavaScript and jQuery, Two server-side APIs, Foundation CSS Framework (https://get.foundation/), Google Fonts.

**Project_2_uofm** | Project_2 Repository: https://bit.ly/3sEpY0s  | Project Live Link: https://bit.ly/3Ckz31W
My role in this project was setting up the handlebars and getting api information loaded on the page.

- This app grabs dnr information when a user logs in and selects an area to explore.

- This app successfully logs a user,  allows the user to select an area to explore and once a button is pressed the api information is loaded on the page. I worked on the handlebars for the information to be displayed and button functionality.

- Tools/Languages: -JavaScript, CSS, html, handlebars, express, axios, bcrypt, connect-session-sequelize, dotenv, express-handlebars, express-session, mysql2, sequelize.

**Creative Dev Project** | Project Repository: https://bit.ly/3tlo6Dm  | Project Live Link: https://bit.ly/3KFdXOO
My role in this project was setting up the back-end using graphql and participating in the front-end.

- Open source platform for users (specifically devs) to share creations.

- Users can login or sign in and be brought to the main blog page with options to post a project or comment on other user posts.

- User can view their profile page to view posts they have made, as well as delete or make an update.

- Once the user is done either log out or delete the user, if so desired.

- Tools/Languages: -React, JavaScript, React-Bootstrap, CSS, Bcrypt, Express, Graphql, Apollo-server-express, JsonWebToken and Mongoose.

**Previous Work Experience**

**Reinhart**                                                                                          08-2018/ 09-2021
*Truck Driver*                                                                                        Rogers, MN
- As a truck driver I had many responsibilities and as a delivery role customer service is important.
- Worked long hours in the twilight shift and I had many good responses from customers on how much I care about getting the job done right!
- Took various safety precautions when executing a backing maneuver.
- When a product had a questionable quality I will bring it up to the customer for consideration
- Never had a no-show
- Accomplished driver training in the winter

**K&K Metal**                                                                                         09-2021/ 11-2021
*Truck Driver*                                                                                        Minneapolis, MN
- Was responsible for picking up and delivering recycled metal.
- Delivered 40,000bls of metal to be recycled
- Always had a good attitude and understanding with customers
- Was on time for deliveries and treated the products with respect
- Never had a no-show
- Was able to execute a hard backing maneuver when being observed by the boss

**Additional Work Experience**

**Minnesota National Guard**                                                                          04-2017/ Current
*Infantry*                                                                                            MN

- Have acquired good work ethics and responsibility
- Have never missed a day and alway did my best
- Had the responsibility of a security clearance
- Was incharge of $17,500 dollars in equipment
- Have been deployed
- Never had a no-show

**Education**

University of Minnesota, Mn                                                                                          03/2022
Full Stack Developer Certificate
- Educated in creating websites with front-end and back-end logic, along with user friendly designs.
